

Effortless Signage.

APPLICATION INSTRUCTIONS

ClingZ® is a polypropylene film that clings to any dry surface using a static charge. It adheres to wood, brick, metals, glass, drywall, plastic; any surface except certain fabrics. Avoid placing in a drafty location, such as around fans, open doors or vents to maximize its performance.

1. Store in its original packaging until ready to apply
2. Make sure the surface is clean and dust free
3. Slowly remove the backer from the film – for large graphics having 2 people will be helpful
4. Simply place on the surface and smooth with your hands or with a felt squeegee
5. Adjust as necessary
6. To remove, simply pull away from the surface and recycle
