

ClingZ® Wide Format

Designed for UV Curable Wide Format Printers

ClingZ® Wide Format is an electrically charged, printable film for temporary indoor signage applications.

It's the media recognized for its versatility, clinging to indoor surfaces such as glass, drywall, metal, wood, brick or marble without an adhesive. **ClingZ®** is very easy to use, simply remove from the liner, place the graphic, slide into position and peel away to remove. No special installation is required.

Adhered to a 3 mil film liner for ease of printing **ClingZ®** Wide Format is available in white or clear film. Roll widths are 42", 54" or 60" (106cm, 137cm or 152cm) and roll lengths are 60', 150' or 250' (18m, 46m, or 76m). Sheets for flatbed printing are also available in 20x28 or 28x40 (51cmx71cm or 71cmx101cm) sizes.

Applications include:

- Retail Advertising
- Short run signage
- Tradeshow Graphics
- Posters or banners
- Temporary wallcovering

Features:

- Dry erasable in unprinted areas
- Clings for 1-3 months
- No adhesive residue
- Easy installation and removal

ClingZ® Wide Format is compatible with a variety of UV Wide format printers. Contact ClingZ, Inc. for more details.

Testing for specific equipment and intended applications is recommended.
