

ClingZ® for HP Indigo

Designed for HP Indigo Digital Color Presses

ClingZ® for HP Indigo is an electrically charged polypropylene film designed for printing on HP Indigo 5000, 7000 and 10000 series multi-shot digital color presses.

It's versatile, clinging to indoor surfaces such as glass, drywall, metal, wood, brick or marble for up to 3 months without an adhesive. Simply remove the **ClingZ®** film from the liner and place on any indoor surface. To remove, just slide it off the surface - no sticky residue!

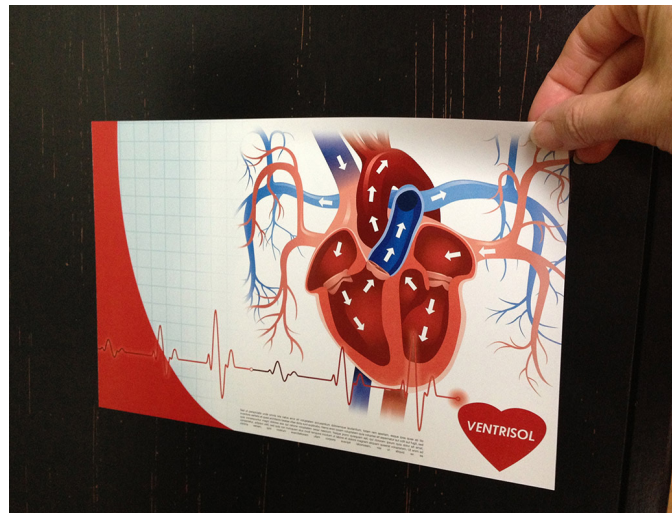

ClingZ® for HP Indigo is a white or clear film fully adhered to a 10pt. paper liner. The film delivers a superior print surface for eye catching graphics. If printing on the liner, please contact ClingZ for technical assistance. **ClingZ®** is available in 12"x18", 13"x19", 20.5"x29.5" or 32x46cm sheets. Cut size sheets are packaged in cartons of 500 (5 packages of 100 sheets). The larger folio size for the 10000 is packaged 300 per carton (3 packages of 100). The weight is 269 gsm for white and 261 gsm for clear (grams/meter²).

ClingZ Film features include:

- Excellent ink adhesion
- Superior print quality
- 3-star HP/RIT certification rating for White (Clear pending)

Applications include:

- Window Graphics
- Promotions
- Variable data direct mail
- Point of purchase
- Posters

Testing for specific equipment and intended applications is recommended prior to full press run.
